### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

*Claim Rejections - 35 USC § 103*

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Liang et al. (Liang), U.S. Patent 6,649,037.

The Liang patent discloses the claimed electrodeionization, wherein the water from the outlet of the diluting compartment is fed to the inlet of a concentrating compartment (see example 1, starting on column 14). The reference further discloses the use of the same types of ion exchange materials, and the same types of arrangement of the ion materials (see cols. 6, lines 49-60, col. 9 and 10). The reference while disclosing a two-stage system, does disclose that the different configurations may be within a single module (see col. 10, lines 57-65).

Therefore, since the reference discloses each and every limitation, the claims are anticipated.

In the alternative, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Liang patent, because given the disclosure of Liang one having ordinary skill in the art would find it predictable to select from the variety of different configurations based upon the material being treated and removed to obtain the purified liquid.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Liang as applied to claims above, and further in view of Liang '422 applied as of record.

The Liang patent does not disclose the tie rods as claimed. The prior Liang patent teaches the use of tie rods as conventional in the assembly of electrodeionization cells (see col. 7, lines 33-66).

Therefore, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Liang patent with the teachings of the '422 patent, because the '422 patent teaches the conventional use of tie rods to secure the electrodeionization cell.

*Response to Arguments*

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun S. Phasge whose telephone number is (571) 272-1345. The examiner can normally be reached on MONDAY-THURSDAY, 7:30-6:00.
